

Climate

OUR ACTIVITY

2023

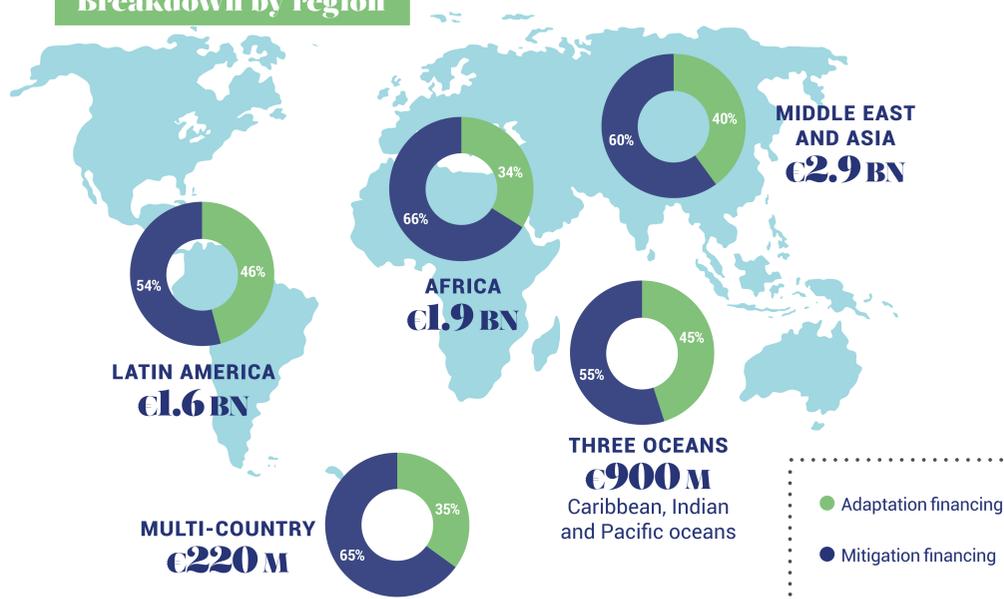

AFD Group's climate action in 2023

€7.5 BN in climate financing committed in developing countries and in Overseas France by AFD Group in 2023

X3
Annual adaptation financing since 2017

New commitments

Breakdown by region

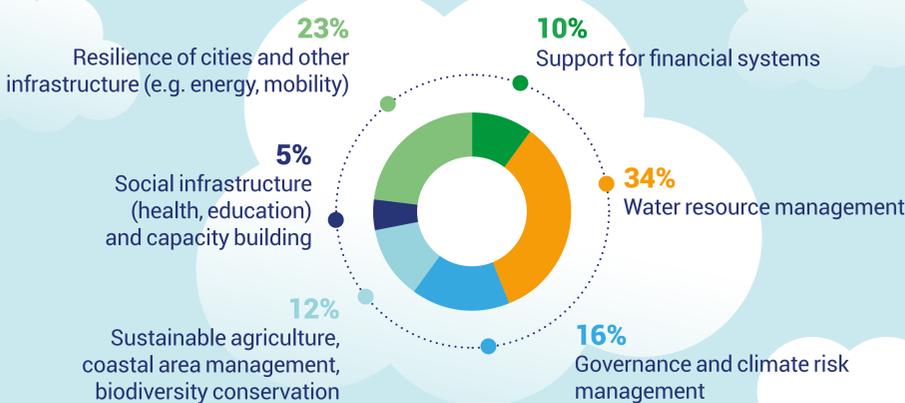

Promoting adaptation to the effects of climate change

€3 BN dedicated to adaptation projects

+33% compared to 2022

Breakdown by sector

Mitigating the effects of climate change

Climate change mitigation aims to reduce global warming through projects to decrease greenhouse gas (GHG) emissions or protect GHG sinks and reservoirs.

€4.5 BN committed to mitigation projects in 2023

The projects funded in 2023 will contribute to several SDGs:

- 50,000 people will benefit from renewable energy thanks to climate projects financed in 2023.
- 3,715 MW of renewable energy will be installed or rehabilitated.

- 9.5 million people will have better access to a sustainable urban transport system.

Supporting the low-carbon and resilient trajectories of our partner countries

AFD Group supports countries in developing and implementing public policies to facilitate a fair and resilient low-carbon transition.

€1.9 BN in public policy loans for climate in 2023

FACILITÉ 2050

34 countries supported by Facility 2050 to develop and implement their long-term strategies (LTS) for low-carbon and resilient development

The private sector and French expertise mobilized for the climate

€1 BN
in funding with
co-benefits for
the climate committed to

€48.8 M
in delegations of funds from
the European Union signed

Expertise France set up a methodology for assessing and accounting for climate commitments, called "Alignment of Sustainable Development Goals", which was applied to projects implemented in 2023.

40 projects,
an increase
of 16% on 2023

€209 M
of which was dedicated
to adaptation projects.

Supporting civil society committed to climate and nature

46 projects involving civil society organizations, financed in 2023 with the CSO-Initiatives mechanism, provide co-benefits for the climate

for **€46.8 M** i.e. nearly 30% of total commitments to civil society.
